

2024 COLLECTION | SAUNAS

Thermowood Sauna Collection

This collection stands out with its artistic form and material. Thermowood ensures a higher insulation value and a strong solid construction.

leisurecraft
Europe

Thermowood

Thermowood is a chemical-free treated timber material that has the premium natural looks of the wood. It is created in special heated chambers with a temperature higher than 230°C . Due to the heat treatment, this wood has a long life span and higher insulating properties. Besides, it is an environmentally friendly material that is only produced by using only natural methods.

FRONT PORCH

Thermowood Barrel Saunas

This compact and comfortable Barrel Saunas is an outdoor sauna that fits in almost any garden. The round shape of the saunas ensures optimal circulation of heat resulting in a shorter heating time and low energy consumption.

Wood Thickness 46 mm	Adjustable stainless steel bands
Sauna Benches	Adjustable ventilation grill
Removable floor	Wooden door with double-glazed window
Roof finish side, overhang for good drainage	Solid and adjustable hinges and locks
Roof finish front and back with wooden trims	Fully Impregnated supports
